

CWC- mobile

The Fronius CWC-mobile provides for portability in cobot welding. Its compact design, including the transport unit with casters and retractable feet, makes it easy to move the welding cell between different large components. CWC-mobile fulfills statutory safety requirements, is CE-certified, and has a portable glare shield (EN ISO 25980) in the form of safety curtains. Not only that, the welding table makes it simple to weld small series.

Cost effective and safe to use

- Low investment costs
- Profitable, even for small batch runs
- High welding quality and accuracy, irrespective of size or shape
- No specialist welding or programming personnel required
- CE-certified safety thanks to portable glare shield (EN ISO 25980), plus power and speed limiter

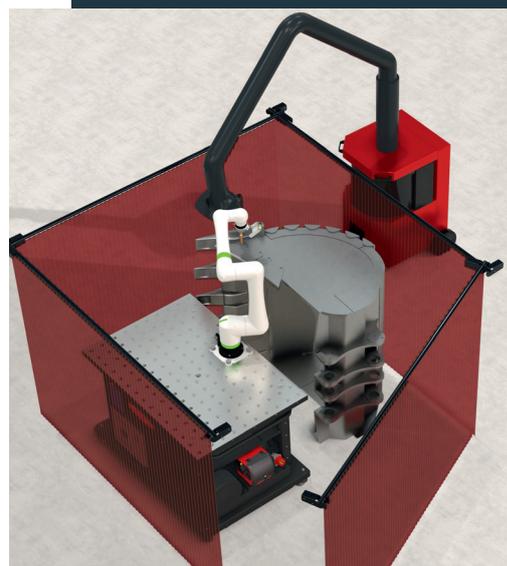

Easy programming

- Easy to program complex welding sequences by guiding the robot to the welding start and end points
- Intuitive creation of programs on the tablet using drag and drop

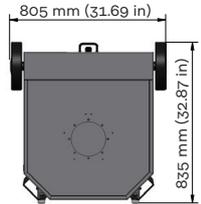

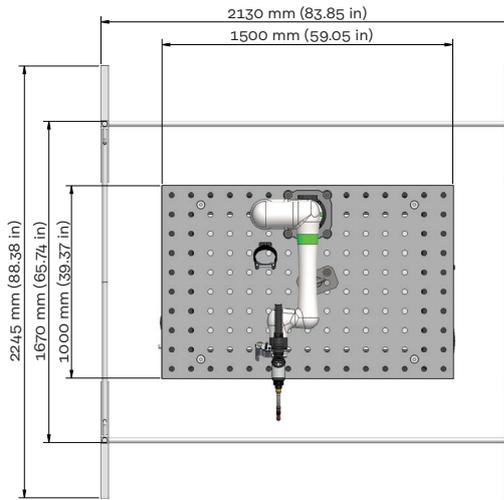

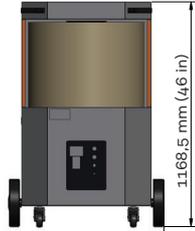

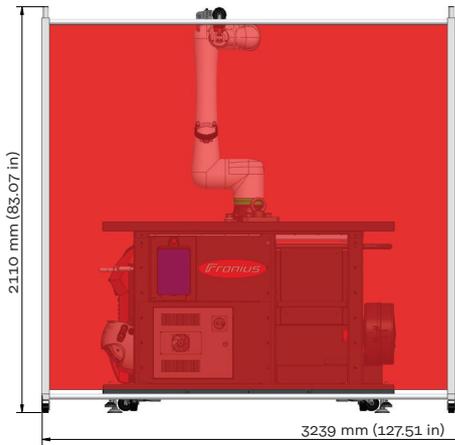

Options

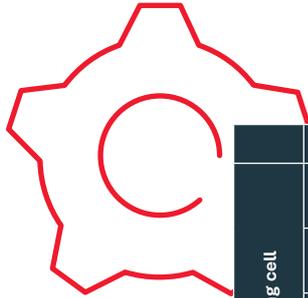

- Welding packages (LSC, PMC, CMT)

Portable glare protection and smoke extraction provide effective protection for operator

Technical data

		CWC-mobile
Welding cell	Welding process	MIG/MAG
	Mains voltage	400 V/N/PE 50-60 Hz
	Dimensions (without safety curtains) l x w x h (mm)	1,500 x 1,000 x 1,680
	System weight (table, cobot, TPS 400i) (kg)	approx. 700
Robot	Number of axes	6
	Repetition accuracy (mm)	+/- 0.04
	Range (mm)	1,300
Welding machine	Type	TPS 400i
	MIG/MAG welding current	3-400 A
